Reference for v1.6

Core (“Legacy”) API

```
curl http://localhost:8001/api/v1/ | jq .resources[].name
"bindings"
"componentstatuses"
"configmaps"
"endpoints"
"events"
"limitranges"
"namespaces"
"namespaces/finalize"
"namespaces/status"
"nodes"
"nodes/proxy"
"nodes/status"
"persistentvolumeclaims"
"persistentvolumeclaims/status"
"persistentvolumes"
"persistentvolumes/status"
"pods"
"pods/attach"
"pods/binding"
"pods/eviction"
"pods/exec"
"pods/log"
"pods/portforward"
"pods/proxy"
"pods/status"
"podtemplates"
"replicationcontrollers"
"replicationcontrollers/scale"
"replicationcontrollers/status"
"resourcequotas"
"resourcequotas/status"
"secrets"
"serviceaccounts"
"services"
"services/proxy"
"services/status"
```

API Groups

```
curl http://localhost:8001/apis | jq .groups[].name
"authentication.k8s.io"
"authorization.k8s.io"
"autoscaling"
"batch"
"certificates.k8s.io"
"extensions"
"policy"
"rbac.authorization.k8s.io"
"settings.k8s.io"
"storage.k8s.io"
"apps"
```

Apps

```
curl http://localhost:8001/apis/apps/v1beta1 | jq .resources[].name
"deployments"
"deployments/rollback"
"deployments/scale"
"deployments/status"
"statefulsets"
"statefulsets/status"
```

Authentication

```
curl http://localhost:8001/apis/authentication.k8s.io/v1 | jq .resources[].name
"tokenreviews"
```

Authorization

```
curl http://localhost:8001/apis/authorization.k8s.io/v1 | jq .resources[].name
"localsubjectaccessreviews"
"selfsubjectaccessreviews"
"subjectaccessreviews"
```

```
curl http://localhost:8001/apis/authorization.k8s.io/v1beta1 | jq .resources[].name  
"localsubjectaccessreviews"  
"selfsubjectaccessreviews"  
"subjectaccessreviews"
```

RBAC

```
curl http://localhost:8001/apis/rbac.authorization.k8s.io/v1beta1 | jq .resources[].name  
"clusterrolebindings"  
"clusterroles"  
"rolebindings"  
"roles"
```

Autoscaling

```
curl http://localhost:8001/apis/autoscaling/v1 | jq .resources[].name  
"horizontalpodautoscalers"  
"horizontalpodautoscalers/status"
```

```
curl http://localhost:8001/apis/autoscaling/v2alpha1 | jq .resources[].name  
"horizontalpodautoscalers"  
"horizontalpodautoscalers/status"
```

Batch

```
curl http://localhost:8001/apis/batch/v1 | jq .resources[].name  
"jobs"  
"jobs/status"
```

```
curl http://localhost:8001/apis/batch/v2alpha1 | jq .resources[].name  
"cronjobs"  
"cronjobs/status"  
"scheduledjobs"  
"scheduledjobs/status"
```

Certificates

```
curl http://localhost:8001/apis/certificates.k8s.io/v1beta1 | jq .resources[].name  
"certificatesigningrequests"  
"certificatesigningrequests/approval"  
"certificatesigningrequests/status"
```

Extensions

```
curl http://localhost:8001/apis/extensions/v1beta1 | jq .resources[].name  
"daemonsets"  
"daemonsets/status"  
"deployments"  
"deployments/rollback"  
"deployments/scale"  
"deployments/status"  
"ingresses"  
"ingresses/status"  
"networkpolicies"  
"podsecuritypolicies"  
"replicasets"  
"replicasets/scale"  
"replicasets/status"  
"replicationcontrollers"  
"replicationcontrollers/scale"  
"thirdpartyresources"
```

Policy

```
curl http://localhost:8001/apis/policy/v1beta1 | jq .resources[].name  
"poddisruptionbudgets"  
"poddisruptionbudgets/status"
```

Settings

```
curl http://localhost:8001/apis/settings.k8s.io/v1alpha1 | jq .resources[].name  
"podpresets"
```

Storage

```
curl http://localhost:8001/apis/storage.k8s.io/v1 | jq .resources[].name  
"storageclasses"
```

```
curl http://localhost:8001/apis/storage.k8s.io/v1beta1 | jq .resources[].name  
"storageclasses"
```
