Introduction

Connect to the Tectonic Console (GUI)

Connect to the Tectonic console for the lab environment by opening up your browser. Make sure to replace `labXX` with your actual lab number (for example: `lab01`).

```
https://ford-labXX.coreostrain.me
username: lab@coreostrain.me
password: coreostrainme
```

Connect to the Bastion Server via SSH (CLI)

Connect to the lab environment bastion node using SSH. Make sure to replace `labXX` with your actual lab number (for example: `lab01`).

```
ssh -i labXX-key lab@ford-labXX-bastion.coreostrain.me
```

Verify

View the `KUBECONFIG` credentials file.

```
cat $HOME/.kube/config
```

Verify that `kubectl` is set up properly by authenticating against the Kubernetes lab cluster and viewing cluster information.

```
kubectl cluster-info
```
